Handpieces: Reusable textiles for a more sustainable restroom hygiene			
Textilia upcy: Innovation in reuse, recycling and textile lifetime extension			
Viima: Detergent-free cleaning with high hygiene standards			
Mats: Absorbent mats for all purposes and places			

FROM DATA TO EVERYDAY EASE

With the right insights, you can continuously improve. Our data gives you a transparent view of your textile usage – so you can balance supply, avoid unnecessary waste and only keep what's truly needed.

Together we can make smarter choices, from selecting textiles with a lower climate footprint to deciding what you want, when you want it. The result: openness, guidance and a smoother everyday life.

Textilia CO₂e calculator

Our calculator shows emissions as well as water, energy, and chemical use. It highlights the main impact areas and helps you act sustainably.

The calculator provides:

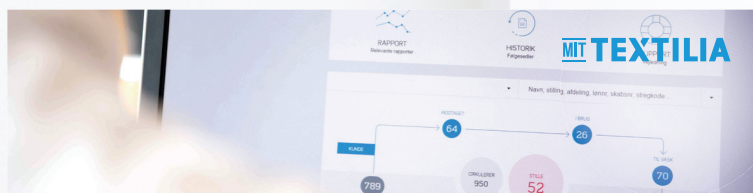

- Footprint overview across scopes 1, 2, and 3.
- Insights into emissions, water, energy and chemicals.
- Basis for setting sustainability targets.
- Documentation for climate reporting.

Textilia Trace – digital textile service

A smart solution that makes handling, tracking and documenting workwear and linen efficient and secure.

- Simple handling – garments dispensed and returned with just a few clicks.
- Improved hygiene – less handling, lower contamination risk.
- Easy compliance – automatic documentation for hygiene and standards.
- Full traceability – clear control of usage and stock.

My Textilia – making complexity simple

Digital laundry and rental service management that saves time, reduces hassle, and makes your everyday easier.

- Instant overview – monitor stock levels, usage, and deliveries instantly.
- Flexibility – adjust solutions to seasons, staffing and changing needs.
- Seamless administration – manage everything online, quick and simple.

THE ART OF KEEPING A CIRCULAR LOOP

THIS HAS BEEN A T-SHIRT

Textiles shouldn't go to waste. At Textilia, we extend their lifetime through care, washing, repair, reuse and recycling.

Together with our customers, we keep textiles in circulation for as long as possible – reducing waste, saving resources and lowering our footprint.

It all starts with choosing textiles designed to last – giving you reliable quality today and recyclability tomorrow.

Documented benefits

– getting the most out of every textile

Our priority:

1. Extend lifespan - care, wash, repair.
2. Reuse - between customers.
3. Upcycle – transform textile waste into new products.
4. Recycle - turn fibers into new fabrics (fiber-to-fiber recycling).
5. Downcycle - other uses (e.g. acoustic panels).
6. Incineration/landfill
– last resort (target 0%).

THIS HAS BEEN A TABLE CLOTH

Textilia upcy – when waste becomes value

Through our sister company Textilia upcy, we turn discarded textiles into new resources.

Founded in 2019, Textilia upcy is our innovation hub – with development and design in Denmark and sewing facilities in Lithuania and Romania.

Textiles are given a second life

From sheets to chef's jackets, from blankets to cardigans – what was once waste becomes part of the loop again.

From t-shirt to handpiece

A worn-out t-shirt is reborn as reusable handpieces, replacing up to 300 paper towels*. A practical solution that reduces waste and makes hand drying more comfortable and gentle.

Cuts CO₂e emissions by up to 70%

Textilia upcy solutions provide an average CO₂e-saving of 70% compared to buying new textiles**

*The LCA is carried out by Niras A/S in September 2022 in accordance with the requirements of ISO 14040/44 including critical review.

** The figure is based on an average of several product comparisons. The calculations are based on ISO 14040/44 standards. The calculations are cradle-to-gate (the manufacturing phase, which includes both raw material extraction, transport and production).

CLEANING THAT CARES

The **Viima system** uses a unique fibre technology to achieve high-quality cleaning with only water and no chemicals.

It helps our customers improve their hygiene standards, reduce the environmental footprint and create healthier working conditions.

Documented benefits

- Up to 90% less use of chemicals.
- Over 80% reduction in water consumption.
- 72% lower CO₂e emissions.
- 35% less physical strain on cleaning staff.

TEXTILIA
viima®

WITH THE HIGHEST STANDARD

Textilia Cleanroom solutions ensure hygiene and safety beyond compromise.

We manage garments and textiles according to strict cleanroom standards, giving you full control, documented compliance, reliable data and peace of mind across your production.

Documented benefits

- ISO-compliant hygiene – validated according to international standards.
- Traceability at every step – full visibility from dispensing to return.
- Reduced contamination risk – through standardized and documented flows.
- Quality assurance – continuous checks, testing, data and documentation.

TURNING CULTURE INTO CUSTOMER VALUE

By bringing together people with different backgrounds, experiences, and skills, we deliver solutions that are flexible and adaptable.

As a textile partner, we approach tasks with an open mind, see possibilities and work to find the best path forward. We believe in freedom with responsibility, respect for individual judgment and an anti-hierarchical mindset.

This enables fast decisions and practical solutions – ensuring customers benefit from agility today and sustainable value tomorrow.

4.15 out of 5

Average job satisfaction score in Textilia.
The target is 4.1.

8.2 years

Average seniority.

Gender diversity

At Textilia, people are at the heart of how we work – and how we create value for our customers.

- **Dedication:** We combine personal commitment with professional advice, always focusing on the customer's needs.
- **Innovation:** We challenge routines and adapt to staffing needs, seasonal changes and daily operations – because no customer is standard.
- **Business focus:** We build solutions that create long-term value for customers, employees and the communities we are part of.

Academy for Competence Development

We offer training for all employees—production and office staff—focused on textile solutions and customer relations. Our goal is that 100% of our employees will be offered competence development by 2025, supported by ongoing training programs.
